

BIO GARY M. DOUGLAS

Best-selling author, international speaker and a sought-after facilitator, Gary Douglas is known for his intensity of awareness and his incredible capacity to facilitate people to 'know what they know'. He chooses to embody consciousness in everything that he does, which inspires others to choose to become more conscious as a result.

Gary came with an exceptional level of awareness into the Midwest middle class 'white bread' family and lived the 'Leave it to Beaver' childhood. He has a very different view on life and realized that he was so different from most of the people he knew when he was only six years old. He became aware of this difference by watching people create their lives and seeing that none of it was about the joy and the possibilities – it was always about the wrongness of everything. Gary knew there had to be more than this reality was offering since there was nothing about it that was magical, joyful or expansive. So, he began seeking deeper awareness to life's mysteries at an early age. Along the way he uncovered a new way forward- one that would create change in the world and in people's lives. He discovered that magic is all around us; it's something we create - its consciousness. He recognized that the capacity to be more aware and more conscious was every person's gift if they were willing to choose it.

Over time what he recognized as the gift he was, was his capacity to invite people to consciousness and to recognize that everything is possible and nothing is impossible. His gift is his ability to look at life, the universe and the consciousness that we all are, as well as the possibilities that are an intrinsic part of it from a space that no one else has ever chosen.
